"I had zero idea about the documentation and the visa process"

Siraj: a first-time applicant who knew nothing about the process. Test prep, documents and visa.

Service	Full support: test preparation, documents, visa process
Starting point	No idea which course, which university, which documents, or how the visa works
Result	Through documents and visa with the team's help. He calls the process "easy and less stressful"

Where he started

Before joining RES, Siraj was confused about the whole study-abroad process. He had not chosen a course or a university. He did not know which documents he needed or how the visa worked.

The problem

Most first-time students are where Siraj was. The real risk isn't marks. It's not knowing the order things must happen in, and missing a step.

What we did

- Prepared him for his test.
- Took him through the documents, step by step.
- Guided him through the visa process.
- Trainers stayed approachable the whole way.

The result

> *"Because of the professional guidance, I felt the whole process was really easy and less stressful. I would really recommend Reknown if you are planning to study abroad."*
> *Siraj, in his own words*
